Benjamin H. Hill; re-elected in 1859 over Hon. Warren Aiken. He was a Secessionist in 1860, and was active and energetic as a war Governor after the State had seceded. In 1861 he was again elected Governor over the Hon. Eugenius A. Nisbet; in 1863 he was again a candidate for Governor, and opposed by Hon. Joshua Hill, an original Union man, and Hon. Timothy Furlow, an original Secessionist; Governor Brown was elected over both by a handsome majority. During the war, Governor Brown opposed the policy of President Davis on the conscript act, but threw no obstacles in the way of the execution of the law by the Confederate Government; he simply discussed with the President the constitutionality of the measure. After the surrender he advocated acquiescence in the reconstruction measures, and became very unpopular on account of his recommendation that the people acquiesce and carry them out in good faith. As the Democratic party opposed these measures, as a reconstructionist he voted for General Grant, who favored them. During the Legislature of 1868 he was nominated by the Republicans for United States Senator, and defeated by Hon. Joshua Hill, which was the only defeat of his life; in every instance when he has been a candidate before the people he has been successful. When General Gordon resigned his position in the Senate Governor Brown was appointed to fill the vacancy; he was afterwards elected over General A. R. The Library of Congress occupies the entire western projection of the central Capitol building. The original library was commenced in 1800, but was destroyed with the Capitol in 1814 during the war with England. It was afterwards replenished by the purchase of the library belonging to Ex-President Jefferson, by Congress, embracing about 7,000 volumes. In 1851 it contained 55,000 volumes, and by an accidental fire in that year the whole collection was destroyed, except 20,000 volumes. It was rebuilt in 1852, when \$75,000 was appropriated in one sum to replenish the collection. The new library halls, three in number, are fitted up with ornamental iron cases and iron ceilings, the whole being perfectly fire-proof. The library is recruited by regular appropriations made by Congress, which average about \$11,000 per annum; also by additions received by copyright, by exchanges, and from the Smithsonian Institution. The library of the Smithsonian Institution has now been deposited in the Library of Congress, where it is secured against loss by fire. This collection is especially rich in scientific works, embracing the largest assemblage of the transactions of learned societies which exist in the country. The library of copyright books was removed here from the Patent Office in 1870, and all copyrights issued in the United States are now recorded in the books deposited in the office of the Librarian of Congress. The present number of volumes in the whole library, including law books, which are kept in a separate library room under the Supreme Court, is over 430,000, besides about 150,000 pamphlets. A new building to contain its overflowing stores of learning and to afford room for their proper arrangement has become a necessity. This collection is very rich in history, political science, jurisprudence, and in books, pamphlets, and periodicals of American publication, or relating in any way to America. At the same time the library is a universal one in its range, no department of literature or science being unrepresented. The public are privileged to use the books in the library, while members of Congress and about thirty official members of the government only can take away books. The library is open every day (Sundays excepted) during the session of Congress from 9 a. m. to the hour of adjournment. In the recess of Congress it is open between the hours of 9 a. m. and 4 p. m., except Saturdays, and in July, August, and September, when the hour of closing is 3 p. m.

THE CAPITOL.

The Capitol fronts the east, and stands on a plateau ninety feet above the level of the Potomac, in latitude $38^{\circ} 53' 20'' 4$ north and longitude $77^{\circ} 00' 35'' 7$ west from Greenwich.

The southeast corner stone of the original building was laid on the 18th of September, 1793, by President Washington, aided by the Freemasons of Maryland. It was constructed of sandstone, painted white, from an island in Aqua Creek, Virginia, under the direction of Stephen H. Hallett, James Hoban, Geo. Hadfield, and afterwards of B. H. Latrobe, architects. The north wing was finished in 1800 and the south wing in 1811, a wooden passage-way connecting them. On the 24th of August, 1814, the interior of both wings was destroyed by British incendiaries, but they were immediately rebuilt. In 1818 the central portion of the building was commenced under the architectural superintendence of Charles Bulfinch, and the original building was finally completed in 1827. Its cost, including the grading of the grounds, alterations, and repairs, up to 1827, was \$2,433,844.13.

The corner-stone of the extensions to the Capitol was laid on the 4th of July, 1851, by President Fillmore, Daniel Webster officiating as orator of the day. Thomas U. Walter was architect, and subsequently Edward Clark, under whose direction the work was completed in November, 1867. The material used for the extensions is white marble from the quarries at Lee, Massachusetts, with white marble columns from the quarries at Cockeysville, Maryland.

The dome of the original central building was constructed of wood, but was removed in 1856 to be replaced by the present stupendous structure of cast iron, which was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The main building is three hundred and fifty-two feet four inches long in front and one hundred and twenty-one feet six inches deep, with a portico one hundred and sixty feet wide, of twenty-four columns on the east, and a projection of eighty-three feet on the west, embracing a recessed portico of ten coupled columns. The extensions are placed at the north and south ends of the main building, with connecting corridors forty-four feet long by fifty-six feet wide, flanked by columns. Each extension is one hundred and forty-two feet eight inches in front, by two hundred and thirty-eight feet ten inches deep, with porticos of twenty-two columns each on their eastern fronts, and with porticos of ten columns on their ends and on their western fronts. The entire length of the building is seven hundred and fifty one feet four inches, and the greatest depth, including porticos and steps, is three hundred and twenty-four feet. The area covered by the entire building is one hundred and fifty-three thousand one hundred and twelve square feet.

The dome is crowned by a bronze statue of Freedom, modeled by Crawford, which is nineteen feet six inches high, and which weighs 14,985 pounds. The height of the dome above the base-line of the east front is two hundred and eighty-seven feet eleven inches; the height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches; and the greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-five feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate chamber is one hundred and twelve feet in length, by eighty-two feet in width, and thirty feet in height. Its galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty feet in length, by ninety-three feet in width, and thirty feet in height.

The Supreme Court room was occupied by the Senate until December, 1859, the court having previously occupied the room beneath, now used as a law library.

The Library of Congress was burned by the British in 1814, and was partially destroyed by an accidental fire in 1851. The present centre hall was finished in 1853, and the wing halls were finished in 1867.

There may be placed upon the cover or blank leaves of any book or of any printed matter of the third class a simple manuscript dedication or inscription that does not partake of the nature of a personal correspondence.

All packages of matter of the third class must be so wrapped, with open sides or ends, that their contents may be readily examined by postmasters.

Third-class matter may be registered and must be fully prepaid.

Printed matter is defined by the act of March 3, 1879, to be "the reproduction upon paper by any process except that of handwriting of any words, letters, characters, figures, or images, or of any combination thereof, not having the character of an actual and personal correspondence." Reproductions by the electric pen, papyrograph, copygraph, hectograph, and other similar processes are third-class matter, unless they have the nature of personal correspondence, when they are first-class.

The limit of weight of packages is four pounds, except in cases of single volumes of books in excess of said weight, and books and documents published or circulated by order of Congress, or official matter emanating from any of the departments of the government, or from the Smithsonian Institution.

FOURTH-CLASS MATTER.

Mailable matter of the fourth class embraces blank cards, card-board and other flexible material, flexible patterns, letter envelopes and letter-paper, merchandise, models, ornamented paper, sample cards, samples of ores, metals, minerals, seeds, cuttings, bulbs, roots, scions, drawings, plans, designs, original paintings in oil or water-colors, and any other matter not included in the first, second, or third classes, and which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail-bag, or harm the person of any one engaged in the postal service, or matter excluded by sections 3893 and 3894 Revised

Statutes, to wit, obscene matter, and matter concerning lotteries. Postage rate thereon, one cent for each ounce or fractional part thereof.

Other articles of the fourth class which, unless properly secured, might destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, may be transmitted in the mails when they conform to the following conditions: 1st. They must be placed in a bag, box, or removable envelope made of paper, cloth, or parchment. 2d. Such bag, box, or envelope must again be placed in a box or tube made of metal or some hard wood, with sliding, clasp, or screw lid. 3d. In case of articles liable to break, the inside box, bag, or envelope must be surrounded by sawdust, cotton, or spongy substance. 4th. In case of sharp-pointed instruments, the points must be capped or encased, so that they may not by any means be liable to cut through their inclosure; and where they have blades, such blades must be bound with wire, so that they shall remain firmly attached to each other. 5th. The whole must be capable of easy inspection. Seeds, or other articles not prohibited, which are liable from their form or nature to loss or damage unless specially protected, may be put up in sealed envelopes, provided such envelopes are made of material sufficiently transparent to show the contents clearly, without opening.

Upon any package of matter of the fourth class the sender may write or print his own name and address, preceded by the word "from," and there may also be written or printed the number and names of the articles inclosed; and the sender thereof may write or print upon or attach to any such articles, by tag or label, a mark, number, name, or letter, for purpose of identification.

The limit of weight of packages is four pounds.

Fourth-class matter may also be registered, and must be fully prepaid.
